### Sixth Grade OSpiraling Review Week 1 of Fifth Six Weeks

<u>Advanced Preparation</u>: Spiraling Review Cards (See Sixth Grade 3<sup>rd</sup> Six Weeks Spiraling Review – 2 sheets per table group exclude the decimal)

Day 1	Each table group will need a deck of Spiraling Review Cards.					
Spiraling review cards	<ul> <li>a) Draw two cards and arrange the cards to create an improper fraction.</li> <li>b) Transform each improper fraction to a mixed number.</li> <li>c) Order the mixed numbers from greatest to least.</li> </ul>					
	Example: $\frac{5}{3} = 1\frac{2}{3} \Rightarrow 5 \div 3 = 1$ with a remainder of $2 = 1\frac{2}{3}$					
Day 2	Jana saw the following rectangular prism on a math test. Her teacher asked her to find the volume.					
	a) What method could Jana use to calculate the volume?					

## Sixth Grade OSpiraling Review Week 1 of Fifth Six Weeks (cont.)

Note: Record all work in your math journal.

## Sixth Grade OSpiraling Review Week 1 of Fifth Six Weeks (cont.)

### Sixth Grade OSpiraling Review Week 2 of Fifth Six Weeks

a) Create both a line plot and a stem and leaf plot for the following set of data:					
Points Scored in a Baskethall Game					
14,	22, 21, 29, 8, 14, 18, 22, 18,	6, 34, 20, 14, 6, 8, 2	0		
,	, , , , , , , , , , , ,	-, -, -, , -, -,	-		
a) Create a pictogra	ph that represents the follow	ing information:			
	Variation of Applan E	ound at the	7		
	Grocery Sto	re			
	Red Delicious	45	-		
	Granny Smith	60			
	Fuji	20			
	McIntosh	35			
	Golden Delicious	55			
Randy is conducting	an experiment on the growth	n of plant spores for l	his science class		
and has recorded the	e following neights of his plar	nt over the last 10 da	iys:		
1 in	3 in 3 in 4 in 5 in 5 in	7 in 8 in 8 in 8	in		
a) Identify and define the range, median, and mode of Randy's data.					
, ,		-			
Tristan researched the prices of several baseballs. These are the prices he found.					
<b>\$4, \$9, \$8, \$4, \$18, \$7, \$6</b>					
a) Use a model to find the mean price of a baseball					
a) Create a sketch of a circle graph to represent the following information on favorite					
flavors of pie.					
	Applas 500	,			
	Apple: 52% Charpy: 26%	0 4			
	Dumnkin: 15	0/			
	Pecan <sup>·</sup> 7%	)			
	<ul> <li>a) Create both a line</li> <li>14,</li> <li>a) Create a pictograd</li> <li>a) Create a pictograd</li> <li>Randy is conducting and has recorded the <b>1</b> in.,</li> <li>a) Identify and define</li> <li>Tristan researched the <b>1</b> in.</li> <li>a) Use a model to fine</li> <li>a) Create a sketch of flavors of pie.</li> </ul>	<ul> <li>a) Create both a line plot and a stem and leaf plenet scored in a Bask 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 22, 21, 29, 8, 14, 18, 22, 18, 14, 19, 15, 15, 14, 14, 22, 21, 29, 14, 18, 22, 18, 14, 14, 14, 14, 14, 14, 14, 14, 14, 14</li></ul>	<ul> <li>a) Create both a line plot and a stem and leaf plot for the following s <ul> <li>Points Scored in a Basketball Game</li> <li>14, 22, 21, 29, 8, 14, 18, 22, 18, 6, 34, 20, 14, 6, 8, 2</li> </ul> </li> <li>a) Create a pictograph that represents the following information: <ul> <li>Varieties of Apples Found at the Grocery Store</li> <li>Red Delicious</li> <li>45</li> <li>Granny Smith</li> <li>60</li> <li>Fuji</li> <li>20</li> <li>McIntosh</li> <li>35</li> <li>Golden Delicious</li> <li>55</li> </ul> </li> <li>Randy is conducting an experiment on the growth of plant spores for I and has recorded the following heights of his plant over the last 10 da 1 in., 3 in., 3 in., 4 in., 5 in., 5 in., 7 in., 8 in., 8 in., 8</li> <li>a) Identify and define the range, median, and mode of Randy's data.</li> <li>Tristan researched the prices of several baseballs. These are the price \$4, \$9, \$8, \$4, \$18, \$7, \$6</li> <li>a) Use a model to find the mean price of a baseball.</li> <li>a) Create a sketch of a circle graph to represent the following informations for plan.</li> <li>Apple: 52% Cherry: 26% Pumpkin: 15% Pecan: 7%</li> </ul>		

## Sixth Grade OSpiraling Review Week 3 of Fifth Six Weeks

Day 1	The following table shows grade averages for Mrs. Jones' class.			
		Student	Average	]
		Bobby	78	
		Susie	85	
		Braden	74	
		Marcus	78	
		Mason	90	
		Jared	89	
		Sarah	95	
		Brody	93	
		Chloe	90	
		Justin	73	
		Mary	85	
		Carrie	77	
		Kris	83	
		Kylie	89	
		Chandler	78	
		Jennifer	92	
	<ul> <li>a) Create a line plot to r</li> <li>b) Find the median, mod</li> <li>c) Describe which mease line plot.</li> </ul>	epresent this dat de, and range for sure(s) of central	a. the averages of N tendency is easie	∕Irs. Jones' students. r to determine using a

## Sixth Grade OSpiraling Review Week 3 of Fifth Six Weeks (cont.)

## Sixth Grade Spiraling Review Week 3 of Fifth Six Weeks (cont.)

Day 4	Max is collect data about his favorite baseball player, Albert Pujols. He recorded Pujols' batting average in six different baseball games in the table below.				
	Opponent Batting Average				
		Texas Rangers	.345		
		Baltimore Orioles	.298		
		San Francisco Giants	.312		
		Atlanta Braves	.400		
		New York Mets	.264		
		Los Angeles Dodgers	.312		
	a) Which ga b) What is t c) Determir	ame Pujols get a hit every four o the range for this set of data? he the median for Pujols' batting	out of ten times at bat? average in these six games.		
Day 5	Analyze the following set of data that represents the average temperatures in Texas throughout the summer of 2010:				
	98, 95, 101, 102, 94, 98, 96, 98, 100, 102, 96, 98, 96, 100, 104, 98, 96				
	<ul> <li>a) Determine which type of graph would most appropriately represent this data.</li> <li>b) Describe why this representation is more appropriate than another graphical representation you've been introduced to</li> <li>c) Create an appropriate graphical representation to display this data.</li> </ul>				

## Sixth Grade OSpiraling Review Week 4 of Fifth Six Weeks

<b>D</b> 1		incompatible of 7 and							
Day 1	Amber has a sp	oinner with a radius of 7 cm.							
	a) What is the a	approximate circumference of the s	pinner?						
Day 2	Hunter is putting members at the	g together a family tree, and he is re ir latest family reunion.	ecording the ages	of all his family					
		Family member	Aae	7					
		Mom	32	-					
		Dad	34	-					
		Grandma 58							
		Grandpa 64							
		Great Grandma 94							
		Sister 7							
		Brother 5							
		Aunt (Mom's side) 40							
	Uncle (Mom's side) 36								
	Uncle (Mom's side) 34								
	Aunt (Dad's side) 28								
	Cousin1 14								
		Cousin2	16	_					
		Cousin3	3	_					
	Cousin4 7								
	a) Hunter tells his brother that there is no mode, because two numbers repeat the								
	same amount of times. Is ne conect? Explain.								
	c) Identify the r	nedian of the data							

# Sixth Grade Spiraling Review Week 4 of Fifth Six Weeks (cont.)

Day 3 Day 4	<ul> <li>Diego is trying to sort his closet into three categories: socks, shirts, and pants. He has one pair of black socks, one pair of brown socks, and one pair of white socks. He has one red shirt, one green shirt, one blue shirt, and one black shirt. He has one pair of khakis, and one pair of slacks.</li> <li>a) Construct the sample space for this information.</li> <li>The following is a sampling of the ingredients you can include on your sandwich at</li> </ul>					
	Dezerav's Sandwich Shop					
	Bread Meat Cheese					
	Rye Turkey American					
	Wheat Ham Swiss					
	White Roast Beef Cheddar					
	<ul> <li>a) Create a tree diagram arranging all the combinations of sandwiches at Dezeray's Sandwich Shop</li> </ul>					
Day 5	Amber used the following spinner in a game.					

### Sixth Grade OSpiraling Review Week 5 of Fifth Six Weeks

Day 1	Ana is drawing marbles out of a bag that include 5 black, 4 blue, 3 red, and 2 green marbles.
	<ul> <li>What is the probability of drawing a blue marble?</li> <li>What is the probability of drawing a red or green marble?</li> </ul>
Day 2	Ms. Seifert's math class is rolling numbered cubes to investigate probability.
	a) What is the probability of rolling a number less than 5?
	b) How would this ratio be represented as a decimal?
	C) How would this ratio be represented as a percent?
Day 3	Rafael is spinning a spinner with 5 equal sections of color: blue, yellow, green, red, and black.
	a) Determine the probability of landing on a green, red, or black space
	b) What is the decimal equivalent of this?
	c) what is the probability of landing on anything but yellow?
Day 4	A deck has 52 cards in it, with thirteen cards from each of the four suits: hearts, spades, clubs, and diamonds.
	a) What is the probability of drawing a spade from the deck of cards?
	b) Write and evaluate and expression that could be used to find the complement of
	drawing any card other than a diamond c) What is the probability of drawing a red card?
Day 5	The letters to the word photosynthesis are all placed into a bag.
	PHOTOSYNTHESIS
	a) Determine P(E)
	b) Determine P(S)
	<ul> <li>What is the decimal equivalent of the probability of selecting a T?</li> <li>What is the percent equivalent to the P(N)</li> </ul>
	e) What is the decimal and percent equivalent of selecting any letter other than O?

(pp. 1 of 5)

#### Week 1 Answer Key: Process may vary.

Day 1	Answers will vary depending on the cards drawn by each student.					
	a) See student work.					
Day 2	Answers will vary					
	a) May use the formula to calculate the volume: length x width x height or Area of base x					
	height. $5 \times 4 \times 3 = 60$ cubic units or $20 \times 3 = 60$ cubic units					
Day 3	a) \$200; 400 - 200 = 200					
	b) Sebastian earned the least amount of money.					
	c) $150; 250 - 100 = 150$					
Day 4	a) Yes; The Milton Family spends 33% on Food each month and only 31% on Rent					
	(25%) and Savings (6%)					
	b) $25\% = 25 = 1$					
	$10^{\circ} 25^{\circ} = \frac{100}{100} = \frac{1}{4}$					
	15 3					
	c) $15\% = \frac{100}{100} = \frac{100}{20}$					
Day 5	a) Minimum: 44 mph; Maximum: 103 mph					
	b) 3 wind velocities were recorded in the sixties					
	c) 12 wind velocities were recorded					

#### Week 2 Answer Key: Process may vary.

Day 1	a)
	Line Plot
	X X X X X X X X X X X X X X X X
	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34
	Stem and Leaf Plot
	0 6688 1 44488 2 001229
	3   4   1   8 represents 18

# Sixth Grade OSpiraling Review Fifth Six Weeks

**Answer Keys** 

(pp. 2 of 5)

#### Week 2 Answer Key (continued): Process may vary.

Day 2	a) Varieties of Apples Found at the Grocery Story
	Red Delicious
	Granny Smith
	Fuiji <b>O</b>
	McIntosh
	Golden Delicious
	= 10 apples
Day 3	a) Range: 7 in.; 8 – 1 = 7
	Median: 5 in. Mode: 8 in
Day 4	a) Mean: \$8. See student work.
Day 5	See student work.
	Favorite Pie Flavors
	Pecan 7% Pumpkin 15% Apple 52% 26%

(pp. 3 of 5)

#### Week 3 Answer Key: Process may vary.

<ul> <li>X X X X X X X X X X X X X X X X X X X</li></ul>	Day 1	a) Line Plot:
$\begin{array}{c ccccccccccccccccccccccccccccccccccc$		X
$\begin{array}{c c c c c c c c c c c c c c c c c c c $		X X X X
<ul> <li>73 74 75 76 77 78 79 80 81 82 83 84 85 86 87 88 89 90 91 92 93 94 95</li> <li>b) Median = 85; Mode = 78; Range: 22</li> <li>c) Answers may vary. The mode is easier to determine using the line plot because it has the X's occur most frequently for a specific value or category.</li> <li>Day 2 <ul> <li>a) 5%; 13 - 8 = 5</li> <li>b) 11%; 24 - 13 = 11</li> <li>c) Catching up on Work: 8% = 0.08; Entertainment: 11% = 0.11; Sleeping = 13% = 0.13; Cleaning: 24% = 0.24; Spending time with Family: 44% = 0.44</li> </ul> </li> <li>Day 3 <ul> <li>a) Mode for Boys' data: 5</li> <li>c) The median for the Boys' data is 7.5 with the median for the Girls' data is 7.</li> </ul> </li> <li>Day 4 <ul> <li>a) 4 hits / 10 at bats = 0.4</li> <li>b) Range: 0.400 - 0.264 = 0.136</li> <li>c) Median: 0.312</li> </ul> </li> <li>Day 5 <ul> <li>Answers may vary.</li> <li>a) This data can be most appropriately represented with a line plot of a stem and leaf plot.</li> <li>b) A line plot displays how often teach number occurs, while a stem and leaf plot orders a set of data and displays the frequency of each piece of data.</li> </ul> </li> </ul>		XX XX XX XX XX XX
7374757677787980818283848586878889909192939495b)Median = 85;Mode = 78;Range: 22c)Answers may vary. #### Week 4 Answer Key: Process may vary.

Day 1	a) $C = 2\pi r$ ; 2(3)(7) $\approx$ 42 cm					
Day 2	a) No, there can be more that	n one mod	le for a set	of data.		
	b) No, the range of the data is	s the differ	ence betw	een the gre	eatest and least value. 94	3
	= 91					
	c) Median: 32					
Day 3	a) A tree diagram may also be	e used.	1	<u>.</u>		
		Black	Brown	White		
		Red	Red	Red		
		Khaki	Khaki	Khaki		
		Black	Brown	White		
		Red	Red	Red		
		Slacks	Slacks	Slacks		
		Black	Brown	White		
		Green	Green	Green		
		Khaki	Khaki	Khaki		
		Black	Brown	White		
		Green	Green	Green		
		Slacks	Slacks	Slacks		
		Black	Brown	White		
		Blue	Blue	Blue		
		Khaki	Khaki	Khaki		
		Black	Brown	White		
		Blue	Blue	Blue		
		Slacks	Slacks	Slacks		
Day 4	a)					
				_		
	RYE		WH	E	WHI	
						<u> </u>
		B ∧	T H	RB	T H	RB
		SC AS	CAS	C ASC	L ASC ASC A	5 6
Day 5	<u>л 1</u>					
Day 5	a) P(even) = $\frac{4}{2} = \frac{1}{2}$					
	8 2					
	b) P(less than 10) = $\frac{8}{-1} = \frac{1}{-1} = 1$					
	· · · · · 8 1					
	c) P(greater than 3) = $\frac{5}{-1}$					
	8					

(pp. 5 of 5)

Week 5 Answer Key: Process may vary.	
Day 1	a) P(blue) = $\frac{4}{14} = \frac{2}{7}$
	b) P(red or green)= $\frac{5}{14}$
Day 2	a) P(less than 5)= $\frac{4}{6} = \frac{2}{3}$
	b) $\frac{2}{3} = 0.6\overline{6}$
	c) $\frac{2}{3} = 66.6\overline{6}\%$
Day 3	a) P (green, red, or black) = $\frac{3}{5}$
	b) $\frac{3}{5} = \frac{6}{10} = 0.6$
	c) P(anything but yellow) = $\frac{4}{5}$
Day 4	a) $P(spade) = \frac{1}{4}$
	b) P(anything by diamond)= $\frac{3}{4}$ Complement: $1 - \frac{3}{4} = \frac{1}{4}$
	c) $P(red) = \frac{1}{2}$
Day 5	a) $P(E) = \frac{1}{14}$
	b) $P(S) = \frac{3}{14}$
	c) $P(T) = \frac{2}{14} = \frac{1}{7} \approx 0.143$
	d) $P(N) = \frac{1}{14} \approx 0.071 = 7.1\%$
	e) P(any letter other than O) = $\frac{12}{14} = \frac{6}{7} \approx 0.857 = 85.7\%$
